Lab 14: Web Design Application – AI-Assisted HTML/CSS/JS Generation

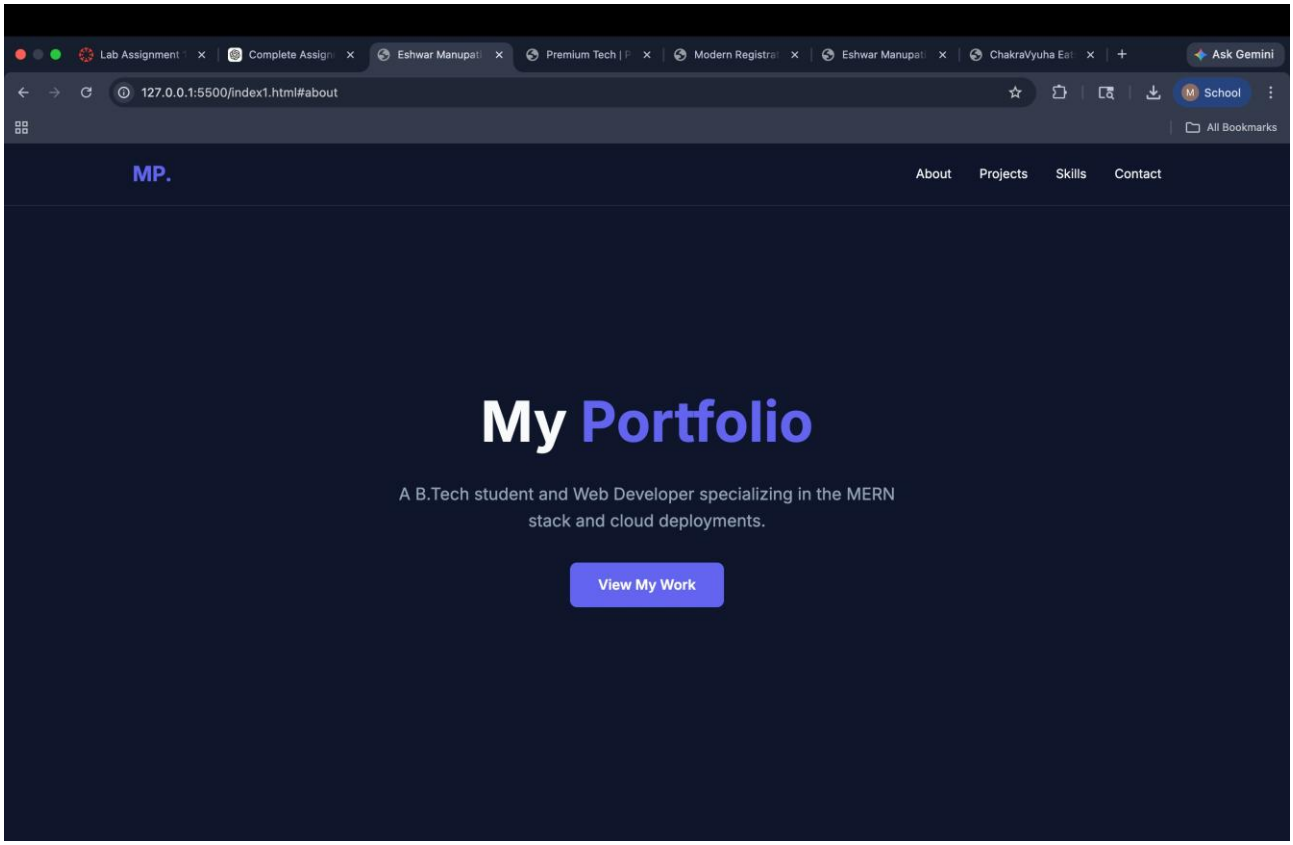
Name:V.Pranavith
Hall Ticket No: 2303A51488

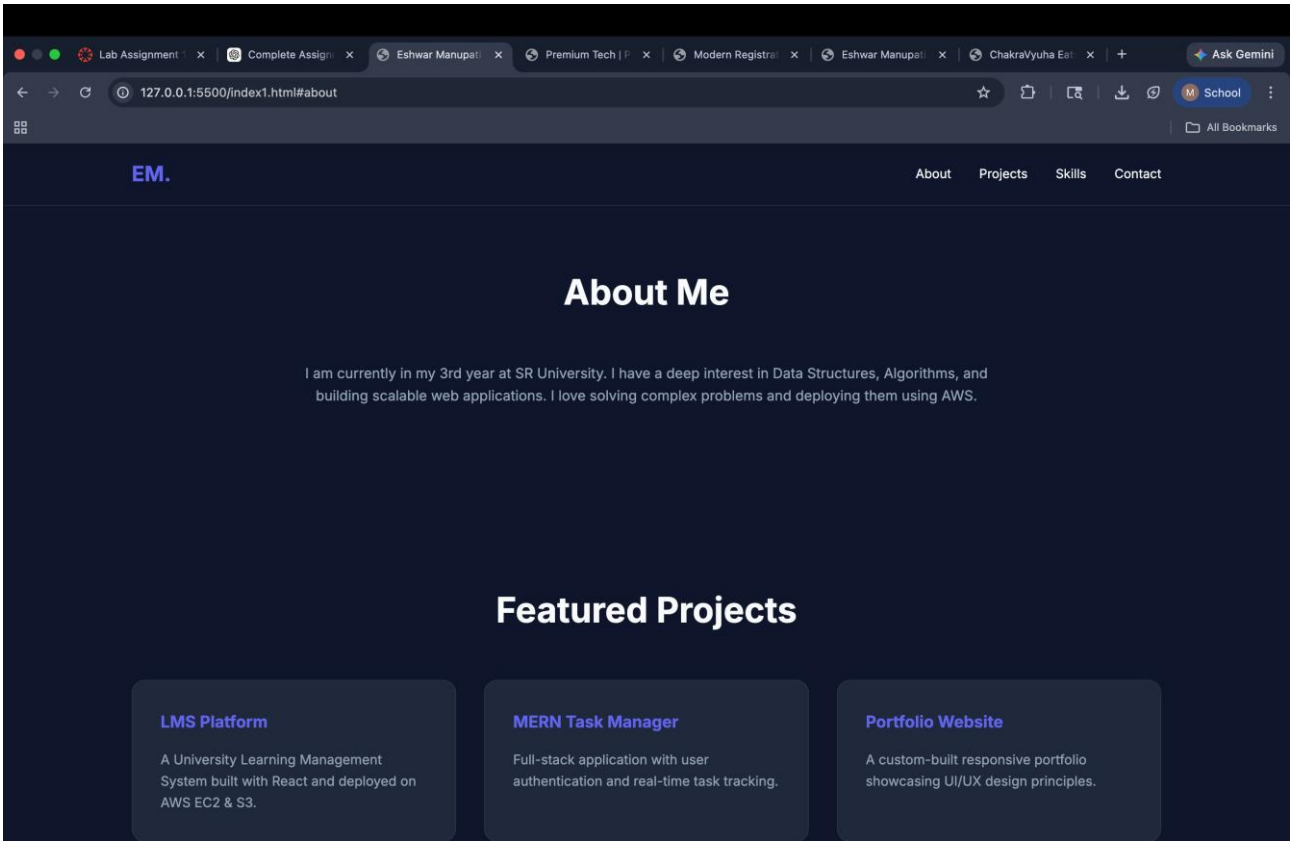
Task 1 – Portfolio Website Design

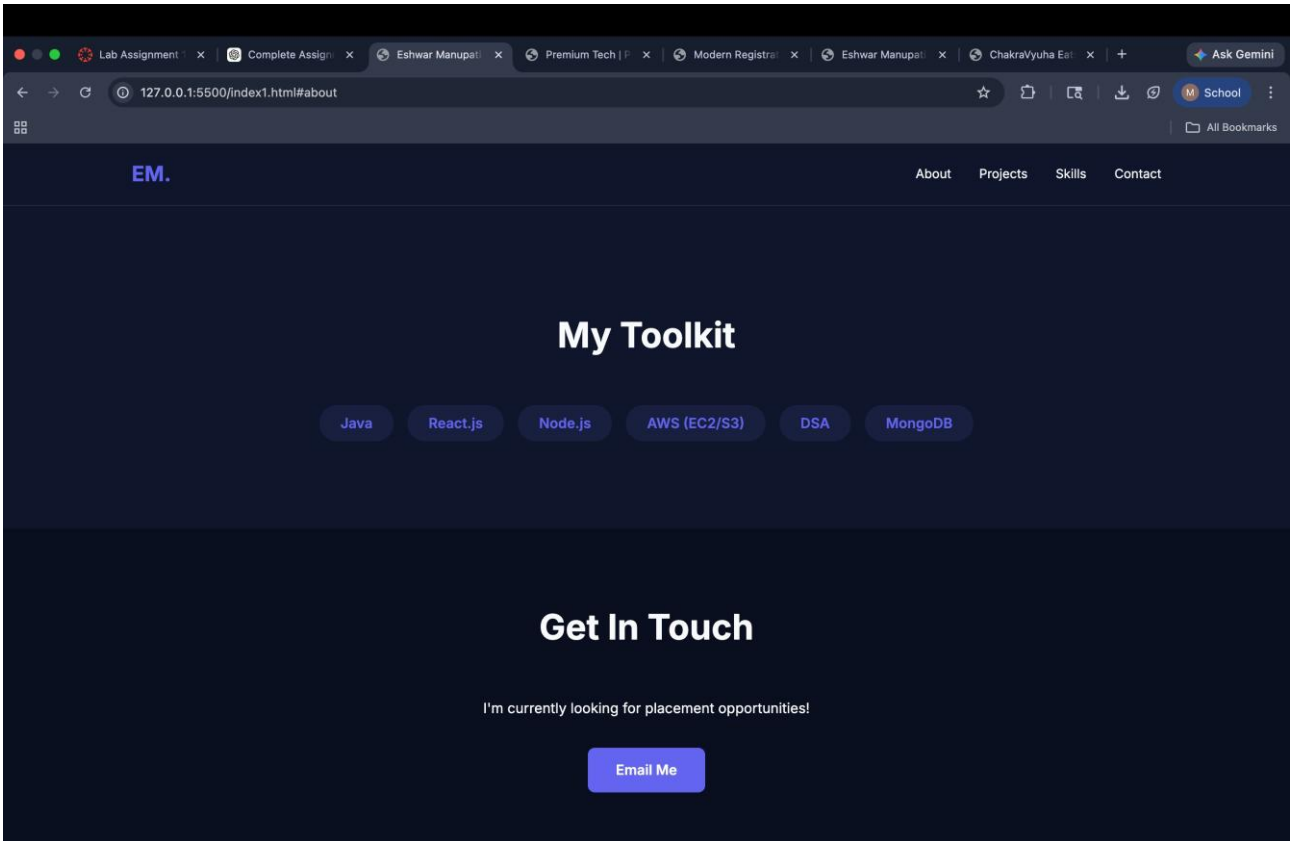
AI Prompt Used:

Act as a Senior Frontend Developer. Create a modern, single-page responsive portfolio using **HTML and Vanilla CSS**. Include a glassmorphism sticky navbar, a hero section with a clear CTA, a project grid with hover animations, and a skills section using badges. Use a **Dark Theme** (Slate and Indigo) and the 'Inter' font. Ensure it is fully mobile-responsive.

The Page:



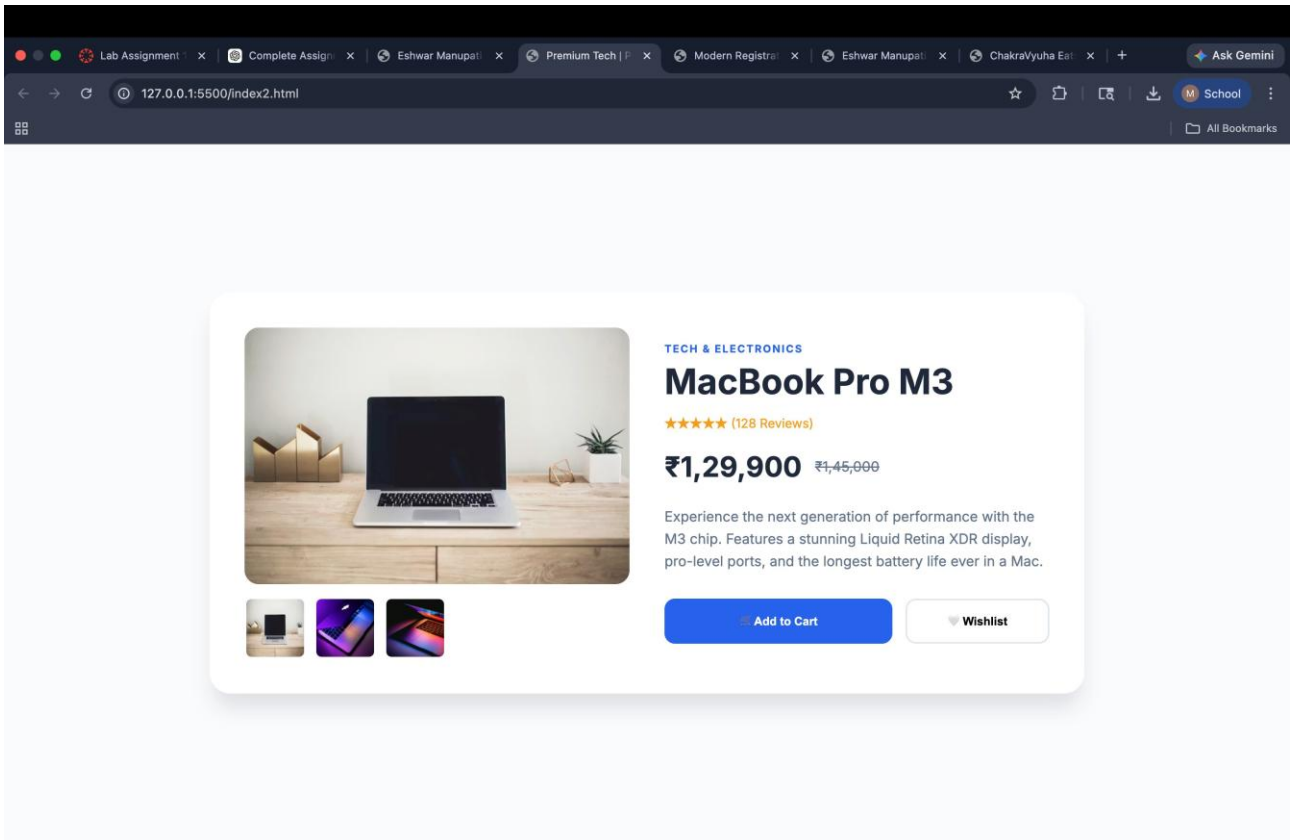




2 – Online Store Product Page:

AI Prompt Used:

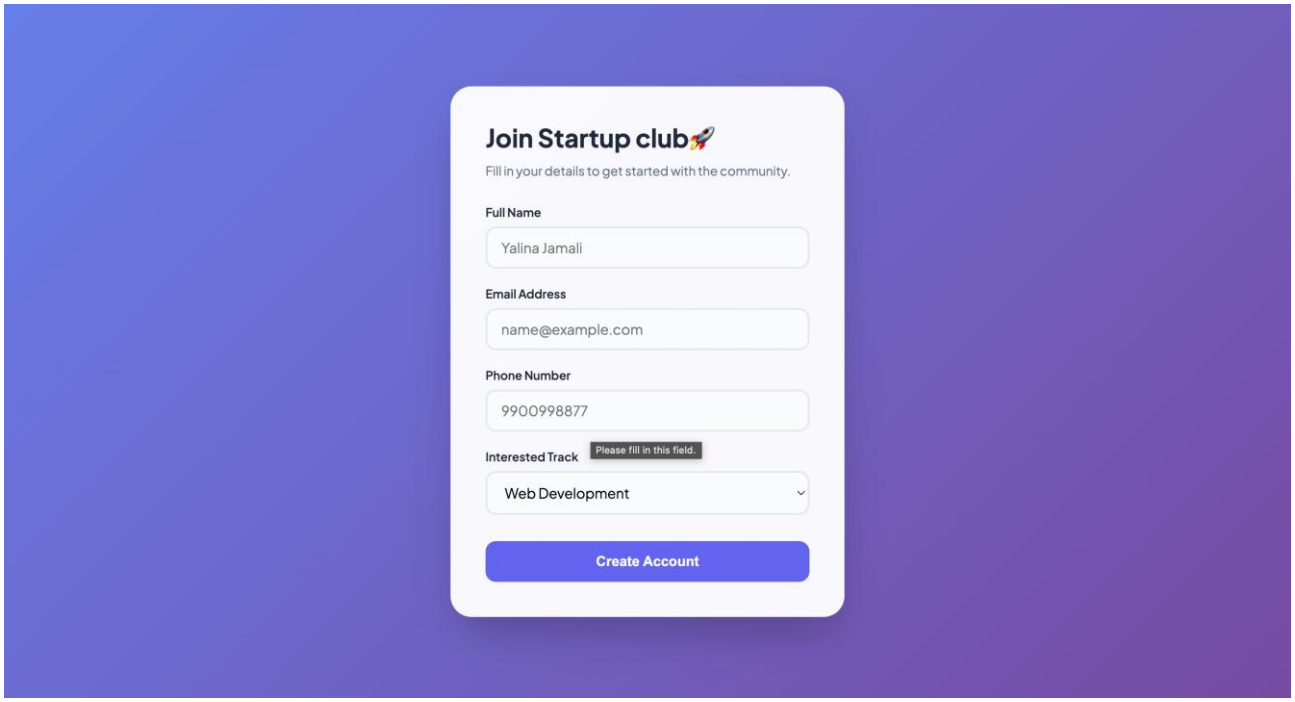
Generate a professional e-commerce product page using HTML and CSS. Use a **two-column grid layout** for desktop (image gallery on left, details on right) that stacks on mobile. Include a main image with thumbnails, a star rating system, price comparison (original vs. discount), and a clear 'Add to Cart' button. Focus on a clean, high-end tech aesthetic with plenty of whitespace.



Task 3 – Event Registration Form

AI Prompt Used:

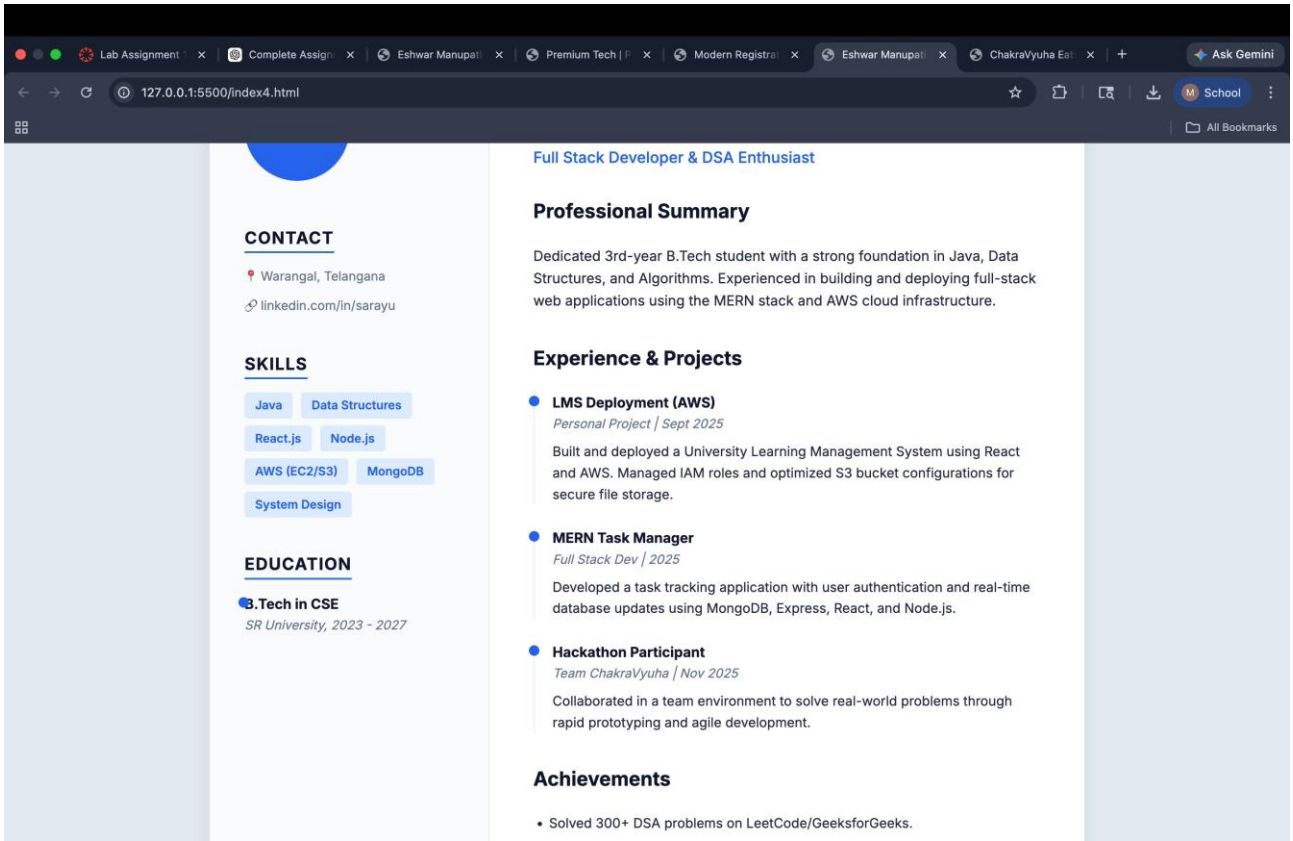
Design a modern, center-aligned registration form. Use a **Glassmorphism** card effect over a soft gradient background. Each input should have a focus state animation and a clear label. Include a dropdown for 'Interest Category' and a 'Submit' button with a subtle lift-on-hover effect. Add a small JavaScript snippet for 10-digit phone number validation.



Task 4 – Resume Website AI

Prompt Used:

Create a responsive, two-column resume template. The **left sidebar** should contain contact info and skills (using tags), and the **right main section** should feature a professional summary and a timeline-style experience section. Use high-contrast typography for readability and ensure the layout is optimized for PDF printing.



Task 5 – Restaurant Menu Page

AI Prompt Used:

Build a mobile-first digital restaurant menu. Include a **sticky horizontal scroll category bar** at the top. Each menu item should be a card showing an image, a 'Veg/Non-Veg' indicator icon, description, and price. Use a 'warm' color palette (Orange/White) to trigger appetite appeal. Ensure the cards transition from horizontal (desktop) to vertical (mobile)
